Email: tonya.woods@ge.com

Dear Valued customer:

The global demand for country-specific approvals marking has been increasing significantly over the past few years, a trend that is expected to continue for the foreseeable future. As a result, we have made some changes to the ordering options for many of our products to include these specific markings. Starting from 1st-June-2015, all the Bently Nevada products used in China end user site for hazardous area applications will use -CN in the agency approve option and will use -00 for non-hazardous area applications. We believe this change will benefit our compliance to country-specific technical regulation.

Sincerely,

A handwritten signature in cursive script that reads 'Tonya Woods'.
